

## **SPECIFICATION**

Part No. : TLS.30.1F21

**Description**: Shockwave 433MHz

Permanent Mount External Antenna

N Type(F) connector

**Features** : ISM 433MHz with 55% efficiency

Mechanically robust for indoor/outdoor applications Height: 79.45mm(3.13"); Diameter: 42mm(1.65")

IP67 and IP69K Waterproof

N type(F) connector

RoHS compliant

#### 1. Introduction

The Shockwave TLS.30.1F21 is a mechanically robust, waterproof, external antenna operating at the 433MHz band with an N type female connector. It has been designed to be used on a Ground Plane.

Common applications are, for example:

- Mesh networks
- Indoor/outdoor asset monitoring
- Security systems
- Remote control systems
- Heavy-duty equipment/vehicle communication in harsh environments

The antenna has 55% efficiency and -1.1 dBi peak gain at ISM 433MHz on a 30x30 cm ground plane. Stable radiation patterns over low angles provides consistent gain in the horizontal plane, meaning that it is especially suitable for mesh networks or hot spots.

A unique indent tab on the base of the antenna allows a wrench to be used to solidly lock the antenna on top of its mounting location while tightening up the nut beneath the metal panel. Waterproof O-rings around the bottom base prevent water from leaking under the antenna.

The TLS.30 antenna is IP67 waterproof and IP69K resistant against high pressure water jets in commercial cleaning environments, which makes the antenna ideal for ISM 433MHz applications in harsh outdoor environments.
