| Snap factor                      | 0.5                      |  |  |  |

#### FEATURES

- · Glass passivated pellet chip junction
- Low forward voltage drop and short reverse RoHS
  recovery time
  COMPLIANT
- Designed and qualified according to HALOGEN JEDEC®-JESD 47
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

### APPLICATIONS

These devices are intended for use in output rectification and freewheeling in inverters, choppers and converters as well as in input rectification where severe restrictions on conducted EMI should be met.

### DESCRIPTION

The VS-90EPF006L-M3, VS-90APF006L-M3 soft recovery rectifier series has been optimized for combined short reverse recovery time and low forward voltage drop.

The glass passivation ensures stable reliable operation in the most severe temperature and power cycling conditions.
